 - People sustaining injury

EDEN CARE
COMMUNITIES

Project & Documentation Review

What have we done?

- Got a start on our Functional Requirements Document
- Began project planning with user stories, lo-fi prototypes, and user flows
- Set up DevOps with tasks for project tracking
- Contacted potential users to help define requirements
- Gathered personas from information provided by Eden Care and ISM

What are we working on?

- Ensuring we use use DevOps to its full extent
- Continuing to communicate with potential users
- Continuing to expand our Functional Requirements Document
- Familiarizing ourselves with Xamarin and ASP.NET Core with practice applications
- Exploring “cloud options” (AWS, Microsoft Azure, Google Cloud Services) - need to finally decide on one soon

Group Reflection:

Do you feel you are on track?

- Yes, though this past scrum was slowed due to waiting to contact customers
- We need to begin exploring our cloud options so we can proceed.

Do you feel any barriers to your success?

- Communicating with customers who are adverse to technology
- iOS development without a Mac

Do you need any help going forward?

- No help is needed at this time.

Any other questions or concerns?

- None at this time.

Mentor Q&A

- Any Questions?
