ENSE 400 Bi-Weekly Scrum Report-Out

THE NI(C)(K)S
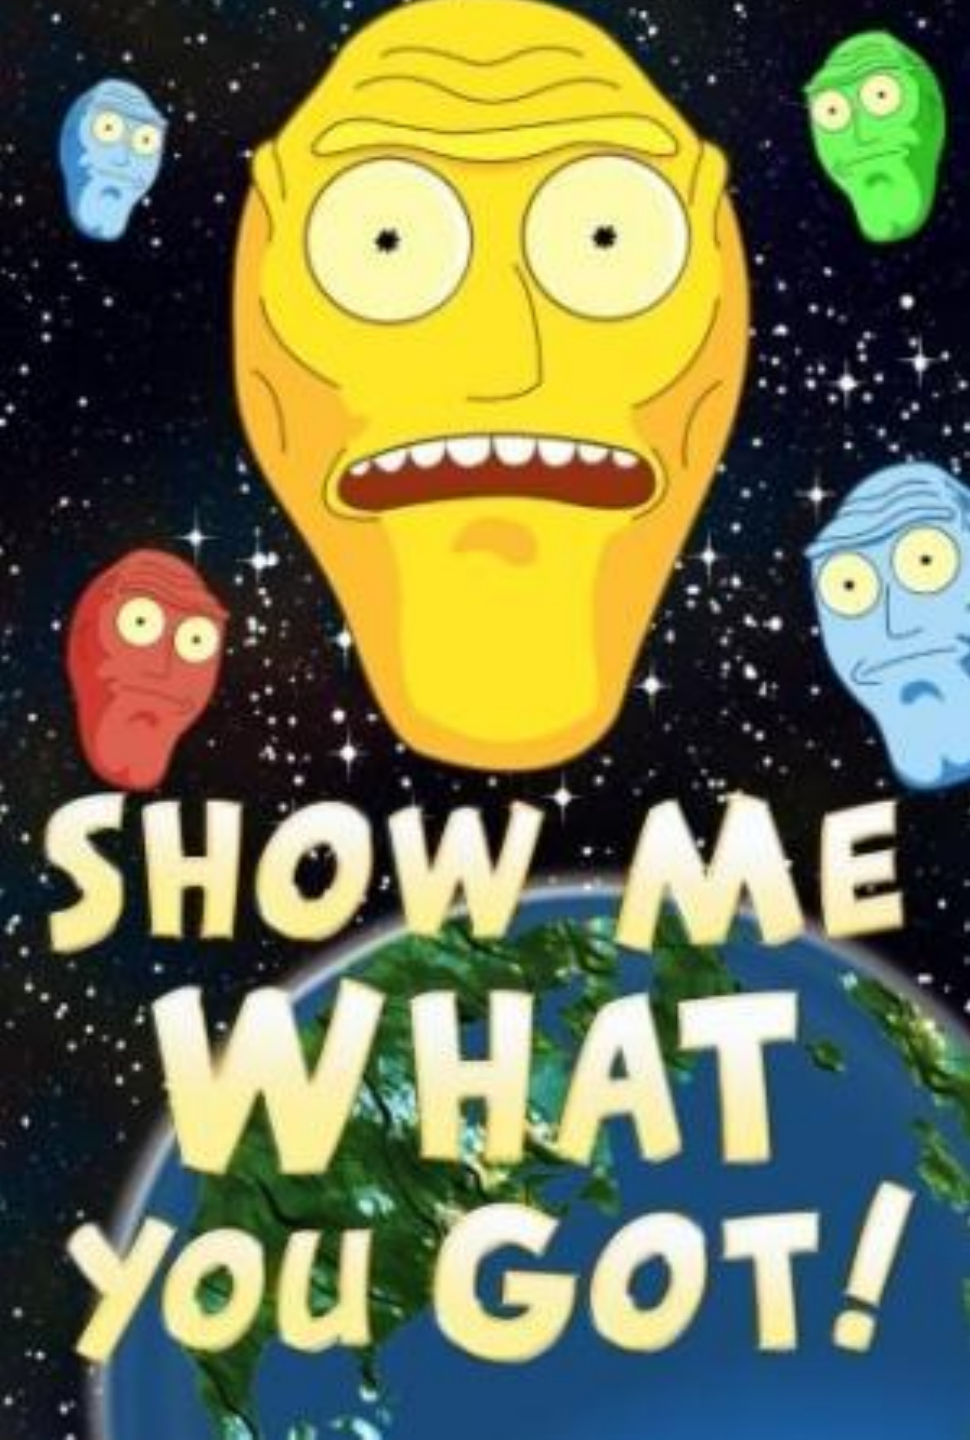

NICKOLAS SCHMIDT, NICOLAS ACHTER, NIKOLAS LENDVOY, SHAYAN KHAN

OCTOBER 21ST, 2019

Project deats

- Eden Care Home Care Application
  - "Skip the Dishes" but for home care
  - Family services
    - A child can order service for their parent, etc.
  - Provide a variety of services to:
    - Elders
    - Injured
    - Mentally/physically disabled

Project & documentation review

- What are you currently working on?
  - Initial phases of learning ASP, Xaramin, developing user stories/low fi prototypes
  - Beginning to use DevOps to track our milestones
- "Show me what you got"
  - Problem definition & requirements documentation/work
    - This was outlined better in our meeting with Bill & Mark
    - Weekly Friday meetings scheduled with Bill & Mark going forward to include "inovative ways to improve homecare"
    - We need to begin our exploration for a service to "house" our project, Microsoft Azure, AWS, etc.
- GitHub/Version control "stamp of approval"
  - Does Tim have access/ need access to DevOps

User Stories:

- ► Define types of users for this program:
  - ► Admin
  - ► Client
  - ► Eden Care employee (home care provider)
  - ► Family member of client?

Admins:

- As an **Admin** I would like to add/remove/modify eden care employees in the applications database

- As an **Admin** I would like the ability to connect clients to their associated family members

- As an **Admin** I would like to see a list of requested services in progress

Client:

- As a **Client** I would like to request home care service for myself

- As a **Client**, I would like the ability to request a removal of myself from the database (in the case where a person needed services for a broken leg and once it is healed they want to be removed)

- As a **Client** I would like the ability to set up recurring appointments on a daily, weekly or monthly time frame

Eden Care Employee:

- As an **Eden Care employee** I would like the ability to view past clients I have provided home care assistance too

- As an Eden **Care Employee** I would like to be notified when a request in which I am to perform comes in

- As an **Eden Care Employee** I would like the ability to modify the approximate time the requested service will be handled

Family Member:

- As a **Family Member** I would like to request home care for my related client

- As a **Family member** I would like to link my account to an associated home care client by asking for their confirmation in a family member status

- As a **Family member** I would like the ability to request a client be removed from the application in the case of death, etc.

Group reflection

- Do you feel you are on track?
  - For the most part, more time investment needed for our "time management software"
- Do you feel there are barriers to your success (if any)?
  - At this moment, our success relies on everyone putting the time into learning the applications we plan on working with, ASP.net, Xaramin, ETC.
  - We need to begin planning our work with DevOps
- Do you need any help going forward?
  - None at this moment
- Any other questions or concerns?
  - No concerns as of yet
